

AEOA hosts first Webinar

First published 30th September 2020

JNCC and the University of Santo Tomás in Chile ran a free webinar on Wednesday 15 July entitled 'Mapping from Space: remote sensing for migratory shorebird conservation at Bahía Lomas Ramsar site'. This is the first project to be run under the Austral Earth Observation Alliance.

The webinar was well received, with eighty delegates from six countries.

You can find out more about this interesting case study (including downloading the webinar video) [here](#)
